Marketing Guide Brand Standards & Marketing Materials User Guide

Brand Standards

Our brand guidelines and usage requirements are evolving as the program grows. Follow these Brand Standards to help us maintain sustainable processes and a recognizable brand as this project grows nationally!

Brand Standards Help

For questions or updates about brand guidelines, please email info@adopt-a-drain.org.

About the Marketing Materials

How to Start: Use this guide to review specs, best-practices, and print vendors for each marketing product. Download standard print-ready materials via <u>Google Drive</u>. Or, contact <u>info@adopt-a-drain.org</u> to customize materials.

<u>Getting Started</u> – standard and custom ordering info <u>Marketing Materials List</u> – our complete list of materials <u>Ordering & Visual Guide</u> – specs, printing, photography, standard and custom options

Brand Standards & Logo Usage

Use only designated marketing materials to promote Adopta-Drain to residents in your area. Marketing materials and logo assets may only be modified by Adopt-a-Drain staff.

Adopt-a-Drain Logo Use (Print): The Adopt-a-Drain logo cannot be used on printed materials not designed by Adopt-a-Drain. We encourage partners to get the word out by using Promo Badges in partner print materials, for example, a flier advertising a local clean-up initiative.

Adopt-a-Drain Logo Use (Online): The blue and brown Adopt-a-Drain logo may be placed in websites, email campaigns, and online, but cannot be used as a button or link. Customize headlines, subheads, and messaging in online content to relate the program to your area, new initiatives, or special projects. Use Promo Badges or online content to promote resident sign up with a link to your state's landing page at adopt-a-drain.org.

Promotional Badges

Promotional Badges contain the Adopt-a-Drain logo and standard text and are available for use in print or online initiatives. Please use headlines, subheads, and messaging along with the badge to relate the program to your local area, new initiatives, or special projects. Design and text are not customizable for Promo Badges due to space and process constraints. Find more details about Promo Badges in the Marketing Materials List and Ordering & Visual Guide.

QR Codes (Optional)

How to Start & Requirements: Some marketing materials have the option to include a QR code that links to the adopta-drain.org landing page for your state.

QR code options are limited to linking a single URL to your state's landing page. Data-tracking via Google Analytics will be set up by our team to show how many people access the link via QR code. Our marketing team will generate a QR code at 1" x 1" with a .125" border, the recommended minimum size for scanning for most smartphones.

Contact info@adopt-a-drain.org to add this option.

Marketing Guide Brand Standards & Marketing Materials User Guide

Marketing Guidelines

We offer flexible options to help you promote the Adopt-a-Drain program. Use only designated branded materials to promote Adopt-a-Drain.

See Ordering Marketing Materials for Standard and Custom options.

Guidelines Help

For questions or updates about marketing guidelines, please email info@adopt-a-drain.org.

Printing

Print Vendors: Many of our marketing materials have been formatted for easy online-ordering. Each product is designed and formatted to unique specifications and should only be printed by the vendors associated with the product. Each marketing product listed in this guide will indicate if it is available as Standard or Custom and whether Adopt-a-Drain staff will assist with printing or if you will be able to order online from the vendor.

Standard Marketing Materials: Download a print-ready file from our <u>Google Drive</u>. Visit the print vendor link associated with that product and follow their upload and ordering instructions. Standard messaging is crafted for universal use and does not allow for inclusion of logos or specific waterways.

Standard content example:

Protect waterways and help prevent localized flooding. Join with neighbors to protect local waterways!

Customized Marketing Materials: Contact info@adopt -a-drain.org for assistance in customizing design to include the name of a local waterway, partner or sponsor name, and logo (see required specs for your marketing product).

Customized content example:

Protect **Puget Sound** and help prevent localized flooding. Join with neighbors to protect **Puget Sound**!

Partner Logos

Submitting a logo for customized materials: Logo text and image must be white to be visible on a blue background (light colors may work in some cases).

Preferred File Type: Vector EPS

*In most cases, Illustrator-created EPS files will be CMYK, high res, and vector. A PDF may work if EPS is not available.

Proofing

Carefully proof every marketing product order.

Each of our partners is responsible for final sign-off for all content: waterways, spelling, URLs, and QR code function.

Proof Quality: Contact print vendors with any questions about the digital proof. Note that many digital proofs are for content and crop placement only. A digital proof does not necessarily reflect design quality, exact color match, or sharpness of image.

Brand Standards & Marketing Materials User Guide

Getting Started

Read this section for instructions on how to order print-ready marketing materials with standard language or customize for your region to highlight a local waterway and/or neighborhood with option to add one logo and partner names.

Note: Due to font and software licensing, all customized materials must be prepared by the Adopt-a-Drain marketing team.

Ordering Help

For questions or updates about promoting Adopt-a-Drain, please email info@adopt-a-drain.org.

Order Standard Materials

Materials using standard language can be downloaded from our <u>Google Drive</u> and sent to online print vendors. A few exceptions may require assistance from Adopt-a-Drain.

Standard Language Examples:

Words highlighted in bold are standard phrases that can be used by anyone to promote Adopt-a-Drain anywhere.

- Keep your neighborhood clean and protect local waterways. Sign up today!
- · A project of Hamline University.

How to Order Standard or Custom Materials:

- Find available marketing materials and printing specs in the Marketing Materials List.
- Browse photo options for standard or custom materials, as well as customization guidelines for custom materials in the **Ordering & Visual Guide**.

Order Standard: Download standard print-ready marketing materials via <u>Google Drive</u>. Place your order online at the designated print vendor listed in the Marketing Materials List for each marketing piece.

Order Custom: Contact info@adopt-a-drain.org

Order Custom Materials

Marketing materials can be customized to highlight a specific waterway in your area with option to add one logo. Due to licensing, all custom materials must be prepared by Adopta-Drain staff. Customized files will be sent to partners to complete the order process with the vendor specified. There may be a small fee for this service.

How Our Custom Messaging Works:

Words highlighted in blue can be customized to highlight a waterway, neighborhood, and/or partner names.

- Keep Highland Park neighborhood clean and protect the Mississippi River. Sign up today!
- Sponsored by Hamline University, the City of Saint Paul, and the Capitol Region Watershed District.

Additional custom changes will be considered on a case by case basis, so long as requests do not significantly alter image aspect ratio, word count, or structure of the design.

Logo Specifications:

Option to include one logo to the right of the Adopt-a-Drain logo on the back of any available marketing piece.

Color: White or light color logo (must be visible on blue)
File type: High res, vector EPS* (w/ transparent background)
Color Mode: CMYK

*In most cases, Illustrator-created EPS files will be CMYK, high res, and vector. In some cases, a PDF may work if it can be converted to a vector EPS.

Brand Standards & Marketing Materials User Guide

Marketing Materials List

Marketing materials can be used selectively for direct mail, events, resident promotion, and more. They are organized by suggested use but most can be used in multiple ways. Use your imagination!

Note: Specs are provided in case it is useful for proofing or vendor communication, but don't sweat it – the level of information provided may not be needed.

Marketing Guide Brand Standards & Marketing Materials User Guide

Ordering & Visual Guide

This section gives detailed information on current marketing materials, including photography options available for each piece and how materials can be customized to represent your area. Standard and Custom order options will be shown when available.

Marketing Materials Help

For questions about Marketing Materials customization or available photography, please email info@adopt-a-drain.org.

Photography Options

We occasionally add photographs featuring residents as models to our image library. Contact info@adopt-a-drain.org for updates.

Marketing Materials in the **Ordering & Visual Guide** display photography currently offered. Our marketing team has selected images that work best within the dimensions of each piece.

Customizing photography to fit within the templates requires professional assistance to meet specific image standards and aspect ratios. See our Photography Guidelines if you'd like to hire a photographer to take photos in your area.

standard and custom options

Brand Standards & Marketing Materials User Guide

adopt-a-drain.org

Ordering & Visual Guide

Not planning to hire a photographer or purchase stock photography to customize marketing materials? Skip this page.

Custom Photography Guidelines

Use this guide for tips on art direction and planning for photo shoots or selecting and purchasing your own stock images. Custom photography options are only available for use with custom marketing materials.

Image sizes listed for each marketing piece include bleed. In most cases, images will be cropped .125 to .25 inches. Plan to leave extra room in the images for bleed.

Photo sizes and approximate orientation for custom marketing materials are smaller than actual size. Some size variation occurs in images for QR code templates.

Square

Horizontal Long Horizontal Short

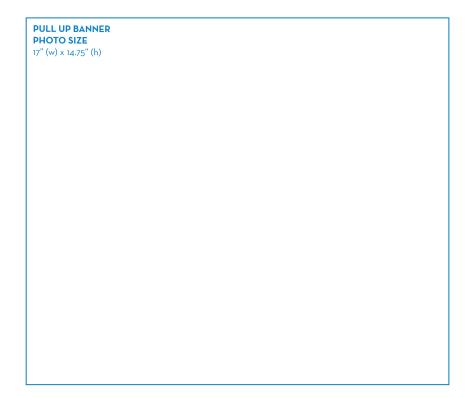

Vertical Tall

Vertical Short

Tips for Successful Photography:

Allow some space around the subjects for cropping options for vertical, horizontal, or square layout orientations.

People should be smiling, wearing gloves, using tools, and modeling safety best practices as outlined on the website. Watch that photos are not "blown out" with too much sunlight, shadow, or high contrast.

adopt-a-drain.org

Welcome Materials

We'll help you communicate with program participants in your area. Order with assistance: Contact info@adopt-a-drain.org

Note: Due to font and software licensing, all customized materials must be prepared by the Adopt-a-Drain marketing team.

Welcome Materials Help

For questions or updates about welcome guidelines, please email info@adopt-a-drain.org.

→ Welcome Email

Every participant will receive an automated email specific to the region and customized with partner logos. Email us with any of the following content that you would like to include.

Note: If you are joining an existing program, email content has been written and cannot be edited. City-specific information can, however, be included in the Welcome Letter if the optional Welcome Packet is part of your contract. (See below.)

Content Options:

- 1. Up to 3 color logos for supporting partners (low res JPGs or PNGs in a square format; simple logos work best here)
- 2. Website URLs that will link from each logo e.g., a city website, a specific stormwater or public woks page, or an informational page about Adopt-a-Drain

→ Welcome Packet

If Welcome Packets are included in your contract, follow these instructions and Adopt-a-Drain staff will order for you.

Welcome Letter

Page 29

Printed size: 8.5" x 11" (single page)

We can customize this one-page letter to include information you would like to convey to program participants. Send us an email with any of the following that you would like to include.

Content Options:

- 1. Public works contact info e.g., name, phone, or email
- 2. Website URLs specific to the city's program
- 3. Resources or waste disposal instructions
- 4. Up to 3 color logos for supporting partners e.g., city, county, watershed, etc. (high res EPS or PDF)

Welcome Card & Safety Tips

Page 30

Folded size: 8.5" x 5.5" (4 vertical panels)

Yard Signs

Page 31

Printed size: 8" x 8" Print material: Coroplast

We work with local partners in each state to refine yard sign templates to represent local geography. Each jurisdiction can choose from these templates and customize select content for each watershed they want to highlight. Yard sign template choices should cover all areas of the city and correspond to GIS data for each highlighted watershed.

Content Options & Quantities:

- 1. Names of water bodies
- 2. A template choice for each water body, for example: Creek, Lake, River, or Sound
- 3. Quantities (minimum 20 for each sign; total number should add up to the number of welcome packets ordered)

Brand Standards & Marketing Materials User Guide

adopt-a-drain.org

Welcome Materials — Welcome Letter (Custom Only)

Smaller than actual size

Adopters receive an automated email and a printed welcome letter (included in the welcome packet, if ordered) outlining helpful FAQs for getting started. If you would like to direct drain adopters to a specific page, a hyperlink or QR code can be added to the welcome letter.

adopt-a-drain.org

Thank you for signing up to adopt a storm drain in your neighborhood!

By adopting a drain, you're committing to keeping the drain and the area around it clear of leaves. trash, and other debris. Below you'll find answers to a few questions that we hope will help you get started with the program.

How often do I need to rake, sweep, clean my storm drain?

There's no specific requirement for how often you need to sweep up. Most people clear their drain about twice a month, but be sure to check the drain before and after big rain storms to avoid flooding, during leaf collection season, and when snow begins to melt.

What special equipment / materials do I need?

A rake, broom, dust pan and bucket or yard waste bag should be all you need in terms of equipment. In the event you are interested in adopting a storm drain on a busy street, it is advised that you clear the drain from the curb, wear bright or reflective clothing and use safety cones if you have access to them. Be aware that leaves, if water-logged, can be heavy enough to break a rake!

Some sorting is involved. Cans, bottles, and appropriate plastic should be cleaned and recycled. Compostable material like leaves and grass clippings can be composted. Other debris like pet waste and trash should go in the garbage.

Is this a safe activity that I can do with my children or a scout troop?

Adopt-a-Drain is meant to be a safe, family activity, however all participants must be supervised by an adult and you must be an adult to sign the waiver. Please take a moment to review our tips or how to clear your drain and stay safe while doing it at adopt-a-drain.org/safety-information.

Who can adopt a drain?

You must be an adult to adopt a drain and sign the liability waiver, however, young people may work on cleanup with parental consent and adult supervision

Sweep up! Rake up! Pick up!

Option to customize, add. or delete content in the Welcome Letter

Option to add up to 3 color logos for supporting partners

adopt-a-drain.org

My time commitments have changed, can I unadopt my drain?

While we ask you to commit to clearing your adopted drain for at least one year, we will assume you are continuing to participate in the program until you notify us otherwise. You can discontinue your participation at any time by logging in to your account and unadopting your drain, or by sending us an email. We'll be happy to help.

What is entailed in estimating the amount of debris I collect? Do I need to use a scale?

Reporting the debris you collect is easy and supports the program by tracking Adopt-a-Drain's positive impact on our watersheds

- Collect: After debris collection, visit <u>adopt-a-drainorg</u>, select your state, and login to your account.
 Reports in the dashboard, choose "Track Impact" and then "Add a Cleaning."
 Estimate: Report your estimate in pounds or gallons; our online calculator will translate gallons
- into pounds for most types of debris. Remember, we just need a rough estimate

the clean-up. But please report in the Adopt-a-Drain tool at least quarterly so we can collect so data and know that you're taking care of your drain.

What if there are materials by or in my drain that I don't feel comfortable or able to remove?

Safety first! Never do anything to put yourself at risk. At no time should you clean inside the drain. If you feel your drain needs extra cleaning (i.e. chronic flooding or blockage) please contact your city.

How can I promote my efforts to my neighbors and the community?

We're so glad you asked! Put a sign in your yard and be ready to tell neighbors who ask about your participation in the program. If you take any great photos when you're out there cleaning your drain, share them with us and follow us on Facebook, Instagram, and Twitter.

Still have a question? Don't hesitate to contact us. Please email us at info@adopt-a-drain.org.

Sweep up! Rake up! Pick up!
